1. Not List

1.1 In Scope

1. User Registration/Authentication:

- The platform will include a robust user registration and authentication system to ensure a secure and personalized shopping experience.

2. Product Search and Filters:

- A powerful search functionality with filters will be implemented to enhance the product discovery process for users.

3. Shopping Cart Management:

- Users will have the ability to easily add, remove, and manage items in their shopping cart for a seamless shopping experience.

4. Order Placement and Checkout:

- The platform will facilitate a smooth and secure checkout process, allowing users to place and track their orders efficiently.

5. Product and Discount Management (Admin):

- Admin tools will be provided for efficient management of products and discounts to streamline administrative tasks.

6. Responsive Design:

- The platform will feature a responsive and user-friendly design to ensure a consistent experience across various devices.

7. API Integration:

- Seamless integration with external APIs will be implemented to extend the platform's functionality and services.

1.2 Out of Scope

1. Offline Capability:

- Full offline capability, where users can browse and make purchases without an internet connection, is not included in the scope.

2. Integration with Logistics Tracking:

- Integration with external logistics tracking systems is not part of the project scope.

3. Security Card Swipe System:

- Implementation of a security card swipe system is excluded from the project scope.

1.3 Unresolved

1. Social media integration

- The decision on integrating social media features, such as social login or sharing capabilities, is still unresolved and pending further discussion

2. Real-Time chat support

- The decision on incorporating real-time chat support for customer assistance is still unresolved and pending further discussion.

1.4 Additional Points for Not List

1. Subscription Services:

- Subscription-based models or services are not within the scope of this project.

2. Advanced Reporting:

- Advanced reporting features beyond basic reporting are excluded from the project scope.

3. Customizable Themes:

- Offering customizable themes for users is not part of the project scope.

4. Social Media Integration:

- Extensive social media integration, beyond basic sharing, is not included in the project scope.

5. Virtual Try-Ons:

- Implementing virtual try-on features for products is excluded from the project scope.
